Docs & Support

Welcome!

Endaoment is Crypto's first and only dedicated Community Foundation

Endaoment is a Community Foundation & public charity built on the Ethereum blockchain, allowing anyone to donate their digital assets to any qualified 501(c)(3) U.S. nonprofit organization.

Our mission is to encourage and manage the charitable giving of cryptocurrency.

We're a California Nonprofit Public Benefit Corporation headquartered in San Francisco, federally tax-exempt under IRS revenue code section 501(c)(3). All donations to Endaoment or and of Endaoment's Funds are tax-deductible to the fullest extent of the law.

Endaoment is supported by our amazing community of donors and nonprofit professionals. Our on-chain smart contracts have been audited by OpenZeppelin and our application interfaces have been built to leverage services and tools native to Decentralized Finance. We'll continue to roll out more features that double-down on making a Community Foundation built for the DeFi community.

You can create a Donor-Advised Fund (DAF) on the Ethereum Mainnet via our app, donate directly to any organization, test out our latest build on the Ropsten test network, or join us on Discord if you have any questions!
